ABSTRACT

PS1 focuses on the following specific areas

- Innovative Satellite Retrievals & Radiative Transfer
- Space-borne Observations of Aerosols and Trace Gases
- RADAR Meteorology: Precipitation and Hydrological Cycle
- Understanding Clouds from Space-borne Observations
- Stratosphere Troposphere Exchange & TTL Dynamics
- Aerosols & Climate: Observations & Modelling
- Trace Gases (including Greenhouse Gases) and Climate: Observations & Modelling
- Space-based Meteorology & Monsoon
- Space-based Monitoring of Ocean, Cryosphere, Geosphere and Biosphere

23-27 February 2026
NESAC, Shillong
